

Training Programme in Integrated Water Resources Management in the Northern Province of Sri Lanka

18-22nd September 2015, Killinochchi

There are emerging problems associated with water resources planning, development and management in the Northern Province with the accelerated development work after the end of conflict. Integrated water resources management is one of the approaches in order to address these complex issues. In this context, it is vital to impart new knowledge to those who are working in the water and associated sectors in the Northern Province. With this objective, a five day residential training programme is jointly organized by the Faculties of Engineering and Agriculture of University of Jaffna and Postgraduate Institute of Agriculture, University of Peradeniya. The training programme is fully sponsored by the CapNet-Lanka and WASO Project.

Content of the course

The following areas are covered during the training programme which also includes field trips, role plays and group work. The local as well international expertise will serve as resource persons.

- Introduction to Integrated Water Resources Management
- Agro-climatology and Hydrogeology of Northern Province
- Sustainable Ground Water Management
- Water Supply & Sanitation
- Multiple water users, Water supply demands and water treatment
- Water availability in Northern peninsula and its equitable utilization
- International Experience in Conflict resolution in water resource
